

Tutorly — Mobile Tutor Booking App UI

Introduction

Tutorly is a modern mobile tutor booking app UI designed in Figma with a clean, aesthetic, and user-friendly experience. The project focuses on creating a smooth tutor discovery and session booking flow using soft pastel colors, modern layouts, and minimal UI elements.

Target Audience

- Students looking for online tutors
- Users who prefer easy session booking
- Young learners who enjoy modern mobile app interfaces
- Students searching for personalized learning experiences
- Users who want a simple and clean booking flow

Design Goal

The goal of this project was to create a visually appealing and user-friendly tutor booking application that improves usability and creates a smooth learning experience.

UX Decisions

- Clean layouts improve readability and navigation
- Large CTA buttons improve user interaction
- Simple booking flow reduces confusion
- Rounded cards and soft colors create a friendly learning experience
- Subject cards help users explore learning categories easily
- Minimal design improves focus and usability
- Consistent spacing creates a professional UI experience

Color Choices

The design uses soft lavender, white, pastel purple, and light neutral shades to create a calm, modern, and premium educational experience.

Screens Included

1. Welcome Screen
2. Home Screen
3. Tutor Details Screen
4. Booking Screen
5. Confirmation Screen
6. Profile Screen

Features Included

- Tutor discovery experience
- Search functionality
